A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and a group of investors decided to start a new company. Kahn had been working on packet-switching technology at Bell Labs, and he had a vision of a new kind of network that would allow people to communicate with each other in a more efficient and flexible way. He had also been working on a new kind of telephone service that would allow people to make long-distance calls at a lower cost. Kahn and his investors decided to start a company that would combine these two ideas. They called it MCI Telecommunications Corporation. The company was founded in 1980, and it was one of the first long-distance telephone companies to offer a flat-rate service. This was a major breakthrough, and it allowed MCI to compete with the established long-distance telephone companies. MCI's success was due to a combination of factors, including Kahn's vision, the company's innovative services, and the support of its investors. MCI went on to become a major player in the telecommunications industry, and it played a key role in the development of the Internet. Kahn's work at Bell Labs and his vision of a new kind of network were instrumental in the creation of the Internet, and MCI's success was a testament to the power of innovation and entrepreneurship.

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
