A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Katz founded MCI Telecommunications Corporation. Katz had previously worked for Western Union and had a vision of creating a new telecommunications company that would compete with the established players of the industry. In 1981, MCI was granted a license by the Federal Communications Commission (FCC) to provide long-distance telephone service. This was a significant milestone for MCI, as it allowed the company to enter the highly competitive long-distance market. In 1982, MCI launched its first long-distance service, MCI Telecommunications Corporation. The company's success was largely due to its innovative marketing and sales strategies, which included offering competitive rates and excellent customer service. By 1985, MCI had become a major player in the long-distance market, and its success had led to the formation of the company as we know it today.
