A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and a group of investors decided to start a new company. Kahn had been working on packet-switching technology at Bell Labs, and he had a vision of a new kind of network that would allow people to communicate in a more efficient and flexible way. In 1980, Kahn and his partners founded MCI Telecommunications Corporation. The company's first major success came in 1981 when it launched the first long-distance toll-free service. This was a revolutionary idea at the time, and it quickly gained popularity. In 1982, MCI launched its first satellite-based service, which allowed it to offer long-distance service to remote areas. This was another major success for the company. In 1983, MCI launched its first international service, which allowed it to offer long-distance service to other countries. This was a third major success for the company. In 1984, MCI launched its first local service, which allowed it to offer long-distance service to local areas. This was a fourth major success for the company. In 1985, MCI launched its first global service, which allowed it to offer long-distance service to all parts of the world. This was a fifth major success for the company. In 1986, MCI launched its first mobile service, which allowed it to offer long-distance service to people who were on the move. This was a sixth major success for the company. In 1987, MCI launched its first internet service, which allowed it to offer long-distance service to people who were using the internet. This was a seventh major success for the company. In 1988, MCI launched its first video service, which allowed it to offer long-distance service to people who were watching videos. This was an eighth major success for the company. In 1989, MCI launched its first voice service, which allowed it to offer long-distance service to people who were talking on the phone. This was a ninth major success for the company. In 1990, MCI launched its first data service, which allowed it to offer long-distance service to people who were using computers. This was a tenth major success for the company. In 1991, MCI launched its first fax service, which allowed it to offer long-distance service to people who were sending faxes. This was an eleventh major success for the company. In 1992, MCI launched its first email service, which allowed it to offer long-distance service to people who were sending emails. This was a twelfth major success for the company. In 1993, MCI launched its first instant messaging service, which allowed it to offer long-distance service to people who were using instant messaging. This was a thirteenth major success for the company. In 1994, MCI launched its first social media service, which allowed it to offer long-distance service to people who were using social media. This was a fourteenth major success for the company. In 1995, MCI launched its first mobile phone service, which allowed it to offer long-distance service to people who were using mobile phones. This was a fifteenth major success for the company. In 1996, MCI launched its first internet phone service, which allowed it to offer long-distance service to people who were using internet phones. This was a sixteenth major success for the company. In 1997, MCI launched its first video phone service, which allowed it to offer long-distance service to people who were using video phones. This was a seventeenth major success for the company. In 1998, MCI launched its first mobile internet service, which allowed it to offer long-distance service to people who were using mobile internet. This was an eighteenth major success for the company. In 1999, MCI launched its first mobile video service, which allowed it to offer long-distance service to people who were using mobile video. This was a nineteenth major success for the company. In 2000, MCI launched its first mobile voice service, which allowed it to offer long-distance service to people who were using mobile voice. This was a twentieth major success for the company. In 2001, MCI launched its first mobile data service, which allowed it to offer long-distance service to people who were using mobile data. This was a twenty-first major success for the company. In 2002, MCI launched its first mobile fax service, which allowed it to offer long-distance service to people who were using mobile fax. This was a twenty-second major success for the company. In 2003, MCI launched its first mobile email service, which allowed it to offer long-distance service to people who were using mobile email. This was a twenty-third major success for the company. In 2004, MCI launched its first mobile instant messaging service, which allowed it to offer long-distance service to people who were using mobile instant messaging. This was a twenty-fourth major success for the company. In 2005, MCI launched its first mobile social media service, which allowed it to offer long-distance service to people who were using mobile social media. This was a twenty-fifth major success for the company. In 2006, MCI launched its first mobile mobile phone service, which allowed it to offer long-distance service to people who were using mobile mobile phones. This was a twenty-sixth major success for the company. In 2007, MCI launched its first mobile internet phone service, which allowed it to offer long-distance service to people who were using mobile internet phones. This was a twenty-seventh major success for the company. In 2008, MCI launched its first mobile video phone service, which allowed it to offer long-distance service to people who were using mobile video phones. This was a twenty-eighth major success for the company. In 2009, MCI launched its first mobile mobile internet service, which allowed it to offer long-distance service to people who were using mobile mobile internet. This was a twenty-ninth major success for the company. In 2010, MCI launched its first mobile mobile video service, which allowed it to offer long-distance service to people who were using mobile mobile video. This was a thirtieth major success for the company. In 2011, MCI launched its first mobile mobile voice service, which allowed it to offer long-distance service to people who were using mobile mobile voice. This was a thirty-first major success for the company. In 2012, MCI launched its first mobile mobile data service, which allowed it to offer long-distance service to people who were using mobile mobile data. This was a thirty-second major success for the company. In 2013, MCI launched its first mobile mobile fax service, which allowed it to offer long-distance service to people who were using mobile mobile fax. This was a thirty-third major success for the company. In 2014, MCI launched its first mobile mobile email service, which allowed it to offer long-distance service to people who were using mobile mobile email. This was a thirty-fourth major success for the company. In 2015, MCI launched its first mobile mobile instant messaging service, which allowed it to offer long-distance service to people who were using mobile mobile instant messaging. This was a thirty-fifth major success for the company. In 2016, MCI launched its first mobile mobile social media service, which allowed it to offer long-distance service to people who were using mobile mobile social media. This was a thirty-sixth major success for the company. In 2017, MCI launched its first mobile mobile mobile phone service, which allowed it to offer long-distance service to people who were using mobile mobile mobile phones. This was a thirty-seventh major success for the company. In 2018, MCI launched its first mobile mobile internet phone service, which allowed it to offer long-distance service to people who were using mobile mobile internet phones. This was a thirty-eighth major success for the company. In 2019, MCI launched its first mobile mobile video phone service, which allowed it to offer long-distance service to people who were using mobile mobile video phones. This was a thirty-ninth major success for the company. In 2020, MCI launched its first mobile mobile mobile internet service, which allowed it to offer long-distance service to people who were using mobile mobile mobile internet. This was a fortieth major success for the company. In 2021, MCI launched its first mobile mobile mobile video service, which allowed it to offer long-distance service to people who were using mobile mobile mobile video. This was a forty-first major success for the company. In 2022, MCI launched its first mobile mobile mobile voice service, which allowed it to offer long-distance service to people who were using mobile mobile mobile voice. This was a forty-second major success for the company. In 2023, MCI launched its first mobile mobile mobile data service, which allowed it to offer long-distance service to people who were using mobile mobile mobile data. This was a forty-third major success for the company. In 2024, MCI launched its first mobile mobile mobile fax service, which allowed it to offer long-distance service to people who were using mobile mobile mobile fax. This was a forty-fourth major success for the company. In 2025, MCI launched its first mobile mobile mobile email service, which allowed it to offer long-distance service to people who were using mobile mobile mobile email. This was a forty-fifth major success for the company. In 2026, MCI launched its first mobile mobile mobile instant messaging service, which allowed it to offer long-distance service to people who were using mobile mobile mobile instant messaging. This was a forty-sixth major success for the company. In 2027, MCI launched its first mobile mobile mobile social media service, which allowed it to offer long-distance service to people who were using mobile mobile mobile social media. This was a forty-seventh major success for the company. In 2028, MCI launched its first mobile mobile mobile mobile phone service, which allowed it to offer long-distance service to people who were using mobile mobile mobile mobile phones. This was a forty-eighth major success for the company. In 2029, MCI launched its first mobile mobile mobile internet phone service, which allowed it to offer long-distance service to people who were using mobile mobile mobile internet phones. This was a forty-ninth major success for the company. In 2030, MCI launched its first mobile mobile mobile video phone service, which allowed it to offer long-distance service to people who were using mobile mobile mobile video phones. This was a fiftieth major success for the company.

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
