A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1981 when Robert E. Kahn, a former AT&T executive, founded MCI Telecommunications Corporation. Kahn's vision was to create a national long-distance carrier that would compete with Western Union and AT&T. In 1982, MCI was granted a license by the Federal Communications Commission (FCC) to provide long-distance service. This was a significant milestone for MCI, as it allowed the company to compete in the long-distance market. In 1983, MCI launched its first long-distance service, MCI Telecommunications. This service was a success, and it helped MCI to establish itself as a major player in the telecommunications industry. In 1984, MCI was acquired by American Telephone and Telegraph (AT&T). This acquisition was a major event for MCI, as it allowed the company to benefit from AT&T's resources and expertise. In 1985, MCI was merged with Western Union. This merger created a new company, MCI Telecommunications Corporation, which was a major player in the telecommunications industry. The merger was a significant event for both companies, as it allowed them to combine their resources and expertise to create a new, more powerful company. The merger was a major step in the evolution of MCI, and it helped to establish the company as a major player in the telecommunications industry.
