A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The history of RCA and its subsidiaries after World War II is a story of innovation and success. RCA's research and development efforts in the field of electronics and communications have led to many of the most important inventions of the past century.
In 1985, RCA was acquired by GE. This was a significant event in the history of the company, as it marked the end of RCA's independent existence. However, the acquisition did not mean the end of RCA's legacy. The company's research and development efforts continued, and many of its inventions are still in use today.
RCA's history is a testament to the power of innovation and the importance of research and development. The company's legacy lives on in the many inventions and products that it has created over the years.
