### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Western**  
The formation of MCI was a result of a number of factors. In 1985, the company was founded by Robert Katz and a group of investors. The company's first major success was in 1986, when it was awarded a contract to provide long-distance service to the U.S. military. This was a significant achievement, as it was the first time that a private company had been awarded such a contract. The company's success was due to its innovative approach to long-distance service, which allowed it to offer lower rates than its competitors. This success led to the company's rapid growth and its eventual acquisition by WorldCom in 1997.
