A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was directly related to the fact that the last decade of the century is a time of rapid change. Western Union, which was founded in 1851, is a company that has survived through the years by constantly adapting to the needs of its customers. In 1985, Western Union was acquired by MCI, and the company was reorganized. The new company was named MCI Telecommunications Corporation. The company's headquarters were moved to Overland Park, Kansas. The company's stock was listed on the New York Stock Exchange. The company's revenue was \$1.1 billion. The company's operating profit was \$100 million. The company's market capitalization was \$1.5 billion. The company's employees were 10,000. The company's products and services included long-distance telephone service, telegraph service, and data processing services. The company's competitors included AT&T, Bell Telephone Company, and Sprint. The company's strengths included its extensive network of long-distance telephone lines, its experience in providing telegraph and data processing services, and its strong financial position. The company's weaknesses included its dependence on long-distance telephone service, its limited product line, and its high operating costs. The company's opportunities included the growing demand for long-distance telephone service, the increasing use of telegraphs and data processing services, and the potential for expansion into new markets. The company's threats included the entry of new competitors, the changing needs of its customers, and the increasing competition for long-distance telephone service.

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
