### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former Bell Labs researcher, and John T. Dunlop, a former AT&T executive, founded Western Union. Kahn and Dunlop were both involved in the development of the ARPANET, the precursor to the Internet. Kahn's work at Bell Labs was focused on packet switching, while Dunlop's work at AT&T was focused on the development of the Bellcore network. The two men's shared interest in network technology led to their collaboration and the formation of Western Union. In 1981, Western Union was acquired by AT&T. Kahn and Dunlop left AT&T to start their own company, MCI. MCI was initially a long-distance telephone service, but it quickly expanded into other areas of telecommunications. In 1985, MCI was listed on the New York Stock Exchange. The company's success was largely due to its innovative marketing and its focus on customer service. MCI's growth was also helped by the fact that it was not subject to the same regulations as the traditional telephone companies. In 1997, MCI was acquired by WorldCom. The acquisition was a major event in the history of telecommunications, as it marked the end of MCI's independent existence. The company's legacy is still felt today, as many of its innovations and services continue to be used and improved upon.

## WFD 2025

Provided by Mark Godbout N6IV

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
