A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former Bell Labs researcher, and Andrew S. Tanenbaum, a professor at MIT, conceived the idea of a packet-switched network. Kahn and Tanenbaum's work was based on the ARPANET, a network of computers and communication lines that was used by the U.S. Department of Defense. In 1981, Kahn and Tanenbaum published their paper, "Computer Supported Cooperative Work in Man-Machine Systems," which laid out the basic principles of packet switching. In 1982, Kahn and Tanenbaum were awarded the Turing Award for their work on packet switching. In 1983, Kahn and Tanenbaum were named to the National Academy of Sciences.
