A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former AT&T executive, was recruited to lead a group of investors to form a new company. Kahn's vision was to create a company that would provide long-distance telephone service at a lower cost than AT&T. This vision led to the formation of MCI Telecommunications Corporation in 1981. MCI's success was due to its innovative use of fiber-optic technology and its focus on providing high-quality service at a lower cost. MCI's success led to its acquisition by WorldCom in 2000.
