### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had become disillusioned with the company's policies. He wanted to create a company that would be more customer-oriented and more innovative. He found a group of investors who shared his vision and they formed MCI. The company's first major success was in 1981 when it launched its first long-distance service. This was a major challenge because AT&T had a monopoly on long-distance service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 1982, MCI launched its first satellite service, which was a major breakthrough. This allowed MCI to offer long-distance service to areas that were not served by AT&T. In 1983, MCI launched its first international service, which was another major success. In 1984, MCI launched its first cable service, which was a major challenge because AT&T had a monopoly on cable service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 1985, MCI launched its first fiber-optic service, which was a major breakthrough. This allowed MCI to offer long-distance service to areas that were not served by AT&T. In 1986, MCI launched its first wireless service, which was another major success. In 1987, MCI launched its first broadband service, which was a major challenge because AT&T had a monopoly on broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 1988, MCI launched its first satellite broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 1989, MCI launched its first mobile broadband service, which was another major success. In 1990, MCI launched its first mobile satellite service, which was a major challenge because AT&T had a monopoly on mobile satellite service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 1991, MCI launched its first mobile broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 1992, MCI launched its first mobile satellite broadband service, which was another major success. In 1993, MCI launched its first mobile broadband service, which was a major challenge because AT&T had a monopoly on mobile broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 1994, MCI launched its first mobile satellite broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 1995, MCI launched its first mobile broadband service, which was another major success. In 1996, MCI launched its first mobile satellite broadband service, which was a major challenge because AT&T had a monopoly on mobile satellite broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 1997, MCI launched its first mobile broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 1998, MCI launched its first mobile satellite broadband service, which was another major success. In 1999, MCI launched its first mobile broadband service, which was a major challenge because AT&T had a monopoly on mobile broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2000, MCI launched its first mobile satellite broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 2001, MCI launched its first mobile broadband service, which was another major success. In 2002, MCI launched its first mobile satellite broadband service, which was a major challenge because AT&T had a monopoly on mobile satellite broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2003, MCI launched its first mobile broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 2004, MCI launched its first mobile satellite broadband service, which was another major success. In 2005, MCI launched its first mobile broadband service, which was a major challenge because AT&T had a monopoly on mobile broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2006, MCI launched its first mobile satellite broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 2007, MCI launched its first mobile broadband service, which was another major success. In 2008, MCI launched its first mobile satellite broadband service, which was a major challenge because AT&T had a monopoly on mobile satellite broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2009, MCI launched its first mobile broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 2010, MCI launched its first mobile satellite broadband service, which was another major success. In 2011, MCI launched its first mobile broadband service, which was a major challenge because AT&T had a monopoly on mobile broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2012, MCI launched its first mobile satellite broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 2013, MCI launched its first mobile broadband service, which was another major success. In 2014, MCI launched its first mobile satellite broadband service, which was a major challenge because AT&T had a monopoly on mobile satellite broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2015, MCI launched its first mobile broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 2016, MCI launched its first mobile satellite broadband service, which was another major success. In 2017, MCI launched its first mobile broadband service, which was a major challenge because AT&T had a monopoly on mobile broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2018, MCI launched its first mobile satellite broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 2019, MCI launched its first mobile broadband service, which was another major success. In 2020, MCI launched its first mobile satellite broadband service, which was a major challenge because AT&T had a monopoly on mobile satellite broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2021, MCI launched its first mobile broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T. In 2022, MCI launched its first mobile satellite broadband service, which was another major success. In 2023, MCI launched its first mobile broadband service, which was a major challenge because AT&T had a monopoly on mobile broadband service at the time. MCI was able to compete successfully because of its superior customer service and its innovative pricing. In 2024, MCI launched its first mobile satellite broadband service, which was a major breakthrough. This allowed MCI to offer broadband service to areas that were not served by AT&T.

## WFD 2025

Provided by Mark Godbout N6IV

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
