A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The history of RCA is a story of innovation and achievement. In 1985, RCA celebrated its 50th anniversary. This year marked a significant milestone in the company's history, as it was the year that RCA was acquired by GE. This acquisition marked the end of RCA's independent existence and the beginning of a new chapter in the company's history. The acquisition was a result of a long and complex process, which began in 1981 when GE first announced its intention to acquire RCA. The acquisition was completed in 1985, and the company was renamed GE RCA. This acquisition was a major event in the history of both companies, and it marked the end of RCA's independent existence.

PURE MOUNTAIN FUN

MECHANICAL WAVES

- Easy to understand
- Can try at home
 - rope, tension vs. motion
- Speed is reasonable
- Fun to watch
 - Shake wave machine
 - big one at MIT 26.100
