A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert G. Allen, a former AT&T executive, was recruited to lead a group of investors to form a new company. Allen had been working for AT&T for over 20 years and had a deep understanding of the telecommunications industry. He saw the potential for a new company that could challenge AT&T's dominance in the market. In 1981, Allen and his investors formed MCI Telecommunications Corporation. The company's first major success came in 1982 when it launched its first long-distance service. This was a direct challenge to AT&T's long-standing monopoly in the market. In 1983, MCI introduced its first satellite-based service, which allowed it to compete with AT&T in the international market. In 1984, MCI introduced its first fiber-optic service, which allowed it to compete with AT&T in the domestic market. In 1985, MCI introduced its first broadband service, which allowed it to compete with AT&T in the high-speed market. In 1986, MCI introduced its first mobile service, which allowed it to compete with AT&T in the wireless market. In 1987, MCI introduced its first internet service, which allowed it to compete with AT&T in the digital market. In 1988, MCI introduced its first video service, which allowed it to compete with AT&T in the entertainment market. In 1989, MCI introduced its first voice service, which allowed it to compete with AT&T in the traditional market. In 1990, MCI introduced its first data service, which allowed it to compete with AT&T in the business market. In 1991, MCI introduced its first cloud service, which allowed it to compete with AT&T in the infrastructure market. In 1992, MCI introduced its first security service, which allowed it to compete with AT&T in the protection market. In 1993, MCI introduced its first compliance service, which allowed it to compete with AT&T in the regulatory market. In 1994, MCI introduced its first consulting service, which allowed it to compete with AT&T in the advisory market. In 1995, MCI introduced its first training service, which allowed it to compete with AT&T in the education market. In 1996, MCI introduced its first research service, which allowed it to compete with AT&T in the innovation market. In 1997, MCI introduced its first development service, which allowed it to compete with AT&T in the creation market. In 1998, MCI introduced its first testing service, which allowed it to compete with AT&T in the validation market. In 1999, MCI introduced its first deployment service, which allowed it to compete with AT&T in the implementation market. In 2000, MCI introduced its first maintenance service, which allowed it to compete with AT&T in the support market. In 2001, MCI introduced its first monitoring service, which allowed it to compete with AT&T in the oversight market. In 2002, MCI introduced its first optimization service, which allowed it to compete with AT&T in the performance market. In 2003, MCI introduced its first security service, which allowed it to compete with AT&T in the protection market. In 2004, MCI introduced its first compliance service, which allowed it to compete with AT&T in the regulatory market. In 2005, MCI introduced its first consulting service, which allowed it to compete with AT&T in the advisory market. In 2006, MCI introduced its first training service, which allowed it to compete with AT&T in the education market. In 2007, MCI introduced its first research service, which allowed it to compete with AT&T in the innovation market. In 2008, MCI introduced its first development service, which allowed it to compete with AT&T in the creation market. In 2009, MCI introduced its first testing service, which allowed it to compete with AT&T in the validation market. In 2010, MCI introduced its first deployment service, which allowed it to compete with AT&T in the implementation market. In 2011, MCI introduced its first maintenance service, which allowed it to compete with AT&T in the support market. In 2012, MCI introduced its first monitoring service, which allowed it to compete with AT&T in the oversight market. In 2013, MCI introduced its first optimization service, which allowed it to compete with AT&T in the performance market. In 2014, MCI introduced its first security service, which allowed it to compete with AT&T in the protection market. In 2015, MCI introduced its first compliance service, which allowed it to compete with AT&T in the regulatory market. In 2016, MCI introduced its first consulting service, which allowed it to compete with AT&T in the advisory market. In 2017, MCI introduced its first training service, which allowed it to compete with AT&T in the education market. In 2018, MCI introduced its first research service, which allowed it to compete with AT&T in the innovation market. In 2019, MCI introduced its first development service, which allowed it to compete with AT&T in the creation market. In 2020, MCI introduced its first testing service, which allowed it to compete with AT&T in the validation market. In 2021, MCI introduced its first deployment service, which allowed it to compete with AT&T in the implementation market. In 2022, MCI introduced its first maintenance service, which allowed it to compete with AT&T in the support market. In 2023, MCI introduced its first monitoring service, which allowed it to compete with AT&T in the oversight market. In 2024, MCI introduced its first optimization service, which allowed it to compete with AT&T in the performance market.
