### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Wireless**  
The history of RCA is closely intertwined with the history of the American radio industry. RCA's early success in the radio industry was a result of its partnership with GE and its acquisition of the rights to the Marconi patent. RCA's radio business was a major part of its early success, and it was a key factor in its rise to prominence in the early 20th century. RCA's radio business was a major part of its early success, and it was a key factor in its rise to prominence in the early 20th century.
