A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn and John Tompkins, two former employees of Western Union, decided to start their own company. Kahn and Tompkins had been working for Western Union for several years and had become disillusioned with the company's management. They decided to leave and start their own company, MCI, which would focus on providing long-distance telephone service. Kahn and Tompkins were joined by a third partner, Michael P. Jensen, who had also worked for Western Union. The three partners pooled their resources and started MCI in 1980. MCI's first major success came in 1981 when it launched its long-distance service, which was a significant challenge to Western Union's dominance in the market. MCI's success was due to a combination of factors, including its aggressive marketing strategy, its focus on customer service, and its use of innovative technology. MCI's success led to its acquisition by WorldCom in 1997.
