A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was directly related to the fact that the last decade of the century is a time of rapid change. Western Union, which was founded in 1851, is a company that has survived through the years by being first to adopt new technologies. In 1985, Western Union was acquired by MCI. This was a significant event in the history of the company, as it marked the end of an era. The acquisition was a result of MCI's growing interest in telecommunications, and it was a key step in the company's expansion into this market. The acquisition was completed in 1985, and it was a major milestone for both companies. Western Union's long history of service to customers was a valuable asset to MCI, and the company's expertise in telecommunications was a key factor in its success. The acquisition was a testament to MCI's vision and leadership, and it was a key factor in the company's growth and success in the telecommunications industry.
