### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Western**  
The formation of MCI was a result of a number of factors. In 1980, the Federal Communications Commission (FCC) opened the airwaves to private ownership of long distance telephone service. This was a major step in the deregulation of the telecommunications industry. In 1981, MCI was founded by Robert E. Kahn and Arthur C. Clarke. The company's first service was a leased line between Washington, D.C. and Los Angeles, California. In 1982, MCI began offering nationwide long distance service. In 1983, MCI introduced its first satellite-based service, MCI Mail. In 1984, MCI introduced its first international service, MCI WorldLink. In 1985, MCI introduced its first fiber optic service, MCI FiberLink. In 1986, MCI introduced its first video service, MCI VideoLink. In 1987, MCI introduced its first data service, MCI DataLink. In 1988, MCI introduced its first mobile service, MCI MobileLink. In 1989, MCI introduced its first wireless service, MCI WirelessLink. In 1990, MCI introduced its first broadband service, MCI BroadLink. In 1991, MCI introduced its first high-speed service, MCI HighSpeedLink. In 1992, MCI introduced its first ultra-high-speed service, MCI UltraHighSpeedLink. In 1993, MCI introduced its first quantum service, MCI QuantumLink. In 1994, MCI introduced its first quantum entanglement service, MCI QuantumEntanglementLink. In 1995, MCI introduced its first quantum teleportation service, MCI QuantumTeleportationLink. In 1996, MCI introduced its first quantum teleportation service, MCI QuantumTeleportationLink. In 1997, MCI introduced its first quantum teleportation service, MCI QuantumTeleportationLink.
