### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors formed MCI Telecommunications Corporation. Kahn had been instrumental in the development of the ARPANET, the precursor to the Internet. He was looking for a way to diversify his investments and saw an opportunity in the telecommunications industry. MCI was initially a long-distance telephone service, but it quickly expanded into other areas, including cable television and satellite communications. In 1985, MCI was a public company and had a market capitalization of over \$1 billion. It was one of the most successful IPOs of the decade. MCI was a major player in the telecommunications industry and was a key competitor of AT&T. It was a pioneer in the use of fiber optic technology and was one of the first companies to offer a nationwide long-distance service. MCI was a major force in the development of the telecommunications industry and was a key player in the competition between AT&T and the new entrants. MCI was a major force in the development of the telecommunications industry and was a key player in the competition between AT&T and the new entrants.
