

A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors decided to create a new company to provide long-distance telephone service. Kahn had been working for AT&T for many years and had developed a reputation as a leading expert on telecommunications. He had also been a member of the board of directors of Western Union, a major competitor of AT&T in the long-distance telephone market. Kahn's vision was to create a company that would provide a more efficient and cost-effective long-distance telephone service than AT&T. He believed that this could be achieved by using a new technology called packet switching, which allowed data to be transmitted in small packets that could be routed through a network of computers. This technology was already being used for data transmission, but Kahn believed it could be adapted for voice transmission as well. He had a strong belief in the potential of packet switching and was determined to make it work. He had a lot of money and a lot of connections, and he was willing to take a big risk. He had a lot of faith in his own ideas and in the people he was working with. He was a visionary and a risk-taker, and he was determined to make his vision a reality. He was a man of great courage and great conviction, and he was willing to stand up to the powerful AT&T monopoly. He was a man who believed in the power of technology to change the world, and he was determined to use that power to create a better future for himself and for his country. He was a man who was not afraid to challenge the status quo, and he was not afraid to take on the odds. He was a man who was determined to make a difference, and he was determined to make a difference in the world. He was a man who was a true leader, and he was a man who was a true pioneer. He was a man who was a true visionary, and he was a man who was a true hero. He was a man who was a true legend, and he was a man who was a true hero.

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.

**Winter Field Day January
25th, 2025**

Winter Field Day is an exciting annual event for amateur radio enthusiasts, taking place on the last full weekend of January. It offers a unique opportunity for radio operators to set up field operations in remote locations, enabling them to connect with other participants worldwide. You may choose to participate solo or get your your friends, family, or whole club involved. Winter Field Day is organized by the Winter Field Day Association. The association strongly believes that ham radio operators should practice portable emergency communications in winter environments. This is because freezing temperatures, snow, ice, and other hazards pose unique operational concerns.
