A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a number of factors. In 1980, the Federal Communications Commission (FCC) opened up the long-distance telephone market to competition. This led to a number of new entrants, including Western Union, which was a major player in the market at the time. In 1981, Western Union was acquired by AT&T. This led to a number of former Western Union employees, including Robert E. Kahn, who founded MCI in 1982. Kahn was a former Western Union employee who had worked on the development of the ARPANET, the precursor to the Internet. Kahn's vision was to create a new long-distance telephone service that would be more competitive than Western Union. MCI was founded in 1982 and quickly gained a reputation for being a disruptive force in the long-distance telephone market. In 1985, MCI was acquired by WorldCom, which was a major player in the telecommunications industry at the time. WorldCom's acquisition of MCI was a significant event in the history of the telecommunications industry, as it marked the beginning of a period of consolidation and competition between major players in the market.
