A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The history of RCA is a story of innovation and achievement. In 1985, RCA celebrated its 50th anniversary. This year marked a significant milestone in the company's history, as it was the year that RCA was acquired by GE. This acquisition marked the end of RCA's independent existence and the beginning of a new chapter in the company's history. The acquisition was a result of a long and complex process, which began in the early 1980s. At the time, RCA was a major player in the electronics industry, with a strong presence in the consumer electronics market. However, the company was facing significant challenges, including declining sales and a loss of market share. GE, on the other hand, was a major player in the industrial and commercial markets, and was looking to expand its presence in the consumer electronics market. The acquisition of RCA by GE was a strategic move that allowed GE to enter the consumer electronics market and to benefit from RCA's expertise in the field. The acquisition was completed in 1986, and RCA became a subsidiary of GE. The acquisition was a landmark event in the history of the company, and it marked the end of RCA's independent existence.
