A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had become disillusioned with the company's policies. He wanted to create a company that would be more customer-oriented and more innovative. He found a group of investors who were interested in his idea and they formed MCI. MCI's first major success was in 1981 when it launched its first long-distance service. This was a major challenge for MCI because AT&T had a dominant position in the market. However, MCI was able to compete successfully and by 1985 it was a major player in the long-distance market. MCI's success was due to its innovative services and its customer-oriented approach. MCI was able to offer services that were not available from AT&T and this gave it a competitive advantage. MCI's success was a major milestone in the history of the telecommunications industry and it paved the way for other long-distance carriers.
