A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

RCA

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former Bell Labs researcher, and John T. Dunlop, a former Western Union executive, decided to start a new company. Kahn and Dunlop were joined by a group of investors, including a group of former Bell Labs researchers, to form MCI Telecommunications Corporation. The company was initially focused on providing long-distance telephone service, but it soon expanded into other areas, including cable television and data services. In 1985, MCI was listed on the New York Stock Exchange. The company's success was largely due to its innovative approach to long-distance service, which allowed it to compete with established carriers like AT&T and Western Union. MCI's stock price rose sharply in the mid-1980s, and the company became a major player in the telecommunications industry.
