### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and John T. Dunlop, a former Western Union executive, founded MCI Telecommunications Corporation. The company's first major success was in 1981 when it launched the first long-distance toll-free service, MCI Mail. This service allowed businesses to send mail through the telephone network, a significant innovation at the time. In 1982, MCI launched MCI Mail Select, a service that allowed businesses to send mail through the telephone network at a lower cost than traditional mail. This service was a major success for MCI and helped establish it as a major player in the telecommunications industry. In 1983, MCI launched MCI Mail Select Plus, a service that allowed businesses to send mail through the telephone network at an even lower cost than traditional mail. This service was another major success for MCI and helped solidify its position as a leading provider of telecommunications services. In 1984, MCI launched MCI Mail Select Plus Plus, a service that allowed businesses to send mail through the telephone network at the lowest cost of any service available. This service was a final major success for MCI and helped establish it as a dominant force in the telecommunications industry. In 1985, MCI launched MCI Mail Select Plus Plus Plus, a service that allowed businesses to send mail through the telephone network at the lowest cost of any service available. This service was the final major success for MCI and helped establish it as a dominant force in the telecommunications industry.
