A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn and John Taylor, two of the founders of Western Union, decided to start a new company. Kahn and Taylor had been working for Western Union for many years and had become disillusioned with the company's management. They decided to start a new company that would focus on providing long-distance telephone service. Kahn and Taylor were joined by other former Western Union employees, including John Taylor, and they formed MCI Telecommunications Corporation in 1981. MCI was initially a small company, but it grew rapidly and became a major player in the long-distance telephone market. In 1985, MCI was acquired by American Telephone and Telegraph (AT&T) for \$1.5 billion. This acquisition marked the end of MCI's independence and the beginning of its integration into AT&T's telecommunications services.
