### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western  
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had become disillusioned with the company's policies. He wanted to create a company that would be more customer-oriented and more innovative. He found a group of investors who were interested in his idea and they formed MCI. The company's first major success was in 1981 when it launched its first long-distance service. This was a major challenge at the time because AT&T had a monopoly on long-distance service. MCI was able to compete with AT&T by offering lower rates and better service. This led to a series of legal battles between MCI and AT&T, which eventually resulted in a Supreme Court decision in 1982 that allowed MCI to compete with AT&T. This was a major victory for MCI and it paved the way for the company's growth. In 1985, MCI was acquired by Worldcom, which was then acquired by Verizon. Today, MCI is a part of Verizon's network of services.
