

SAN JOAQUIN VALLEY SECTION

Report for the month of June

2017

SM Dan Pruitt, AE6SX- ASMs K6YK and N2NS, ACC W6DPD, SEC KF6FIR, aSEC WL7C00,

OOC N1VM, STM K6RAU, PIC KJ60UI, TC W6TE.

Still triple digits in the valley! The only thing less is just 99. My

Field Day was canceled by Fire, others were canceled by floodwaters and

by excessive heat. Bottom line anything can happen. For those

successful Field Day operations, I received about 6 pieces of traffic.

I'm always glad to get those.

On Museum Ship weekend I spent my time on the USS Lucid in Stockton.

They restoring the Minesweeper that was of the class built in Stockton

and used through the Vietnam era. It was great fun and I enjoyed

operating and seeing the shiny brass improvements.

Rough week for me, a little under the weather and an ARRL Presentation

to give this week. Looking forward to promoting ARRL and EmComm as

ARES. Look for some changes in the near future to ARES. Keep those EC

reports coming in.

In your own areas, stay tuned to your local events. They

could be
planned Public Service or on call with your First Responders.
Be
prepared, go kits, batteries and personal items (medications
and
hydration) . Remember if you are in need, you are a liability
during a
response. Get with your local Emergency Coordinator and learn
the lay
of the land
Remember to support "The Amateur Radio Parity Act". Go to the
link
on <http://www.arrl.org/amateur-radio-parity-act> the ARRL
website <http://www.arrl.org/amateur-radio-parity-act> . The
act was introduced in the Senate as S 1534. We have to
continue the
support for this legislation.

73;

Dan Pruitt, AE6SX

To all ARRL Affiliated Clubs: When your club elects new officer\,s, you should update your club's information on the ARRL web page.

The ARRL uses this information to contact your club, or to provide information to your club. You must update this information at least every 2 years to

keep your club on the active list.

CLUBS

CALIFORNIA CITY ARC ++ Next Meeting: Wednesday July 19th.at 7 PM Club

Breakfast at Foxy's Landing, California City Airport. Next Breakfast:

Saturday July 15th at 8:30 AM. Wednesday Net at 7 PM on Randsburg

Repeater 145.340 (-) 100.0 (Except Meeting Night) Backup 147.480

Simplex www.ke6rn.com

CLOVIS ARP ++ Rob AE6GE, took CARP to Pine Ridge School for Field Day.

A lot going on with the "Climb to Kaiser" bicycle event headed by

James K6JDM. Rick, W6KK0 kicked off another T-Hunt with John, K6MI, and

Eric, NI6G as the fox on July 15. This was a nice respite after the

fireworks stand location change and the beginning of the Tour de Lakes

public service event coming up. www.k6arp.org/

FRESNO ARC++ For the August meeting Joe, WA6FFJ, has scheduled the

program with Jim Anderson to speak on the Code Talkers service men that

were used in WWI and WWII. The annual Picnic is on Aug 19 at WA60IB,

Ken's home. A total eclipse in NA happens on Monday Aug 21.

www.w6to.com

LODI ARC ++ Bob, N6TCE, was very pleased that there was mentoring of

new hams at the event. Dennis, NJ6G, stopped at three

different Field

Day locations. He said they were all different, showing the many ways

you can participate in Field Day. Jim, WB6BET, suggested that there

be team leaders next year for each band operated. These team leaders

would be in charge of set up of the antenna and radio for an individual

band. August Program is about Home Solar Power, by Roger Gearhart.

www.lodiamateurradioclub.org/

LOS BANOS ARC ++ June "Frequency" talked about the 4 members showing up

in May as the Field Day committee. This was the reason to cancel Field

Day in Los Banos. It is obvious that some enthusiasm has to be

exhibited, 73; George, W6YD. www.aa6lb.org

SIERRA ARC ++Field Day: Cap and Lori have again opened their home for

our effort and Mike, WA6ARA, has obtained the special event call: K6T.

We have refurbished the tower trailer with fresh paint, tires, and coax.

The tribander has been tested and is performing much better now. Plan on

participating ... Field Day is always a hoot and I promise that you will

have fun! Always the fourth full weekend in June! (That would be the

24th and the 25th!)

Lisa and I ventured to San Mateo for the Bay Area Maker Faire. This is

our sixth year as "Not Your

Grandpa's Ham Radio." It just keeps getting better. We again showed off the Broadband-Hamnet mesh networking, some microwave and DFing gear, software defined radios and the BITX40 low-cost transceiver. My co-author, Jack Purdum W8TEE, and I are creating a set of mods (which he presented at the same time at Hamvention for FDIM) to add a CW mode, AGC and a speech compressor to this sideband-only QRP rig. If you don't know about BITX, checkout <http://www.hfsigs.com>. \$59 shipped to the US. www.qsl.net/wa6ybn/

SEQUOIA ARG ++ At this time, several of us are planning our Field Day operations with our families, up at Camp Andrew Brown, a particularly great place to camp in the mountains above Kernville (after a few miles up into Mountain 99 and then back down the plateau to nearer Kernville). We have a great time; lots of camping fun, good food, great socialization, and yes, some ham radio. www.n6krv.org

STOCKTON DELTA ARC ++ Museum ship weekend: We started setting up MSW on Friday with several hams volunteering to put up antennas and set up stations. This year we used the 3 element yagi, Gap Titan vertical, and end-fed ZEP antennas. Even with some challenging setup issues, we managed to be on the air and operating 2 stations by 4PM

Friday – a full hour before the event started. Weak propagation at times and noisy band conditions did not curb the enthusiasm of our operators and guests.

The ship stayed busy mostly on 40M and 20M but we did get in some good operating on 80M at night and on 15M, 30M and 17M. Our Section Manager

Dan, AE6SX joined us again this year from Fresno for the entire weekend.

John NZ6Q stayed on the boat from Friday morning through Sunday

afternoon and scored us some early morning and late night QSO points.

Sierrah KM6IJT and Brent KM6IKB got on the air on 20Meters for the first

time. Brent's daughter Brianna also got on the air and created a nice

run of stations Saturday afternoon. Duztyynn KM6HDY was a huge help in

setting up and taking down as well as getting on the air.

Field Day:

The club members voted this year to join the Lodi Club Field and I'd

have to say the joint venture was as much successful as it was fun. Club

members also put W6SF on the air at the club operating site on DeVries

Rd. As of publication I have not heard final scores on that effort. Here

are pictures club members sent to the newsletter from their Field Day

activities and Jim Sieferling, WB6BET's Field Day Report. We had a

great Field Day this year, in spite of the predicted marginal HF

propagation. The final attendance count was 43. Thank you to all that participated in any aspect of our field day operation. Craig and Matthew Thompson were great hosts for field day. Thank you Jason for manning the "DeLorean", grilling the sausages, and Emilia for arranging all food. We had 17 operators in the log data file. Congratulations to John Litz on being top dog, with 90 contacts. Mike Zane followed closely with 78 contacts. (editor's note: CW CW CW – an empty station and wide open 40M CW band made the difference www.w6sf.org)

TULARE Co. ARC ++ Hopefully Tulare Co. ARC and Porterville will sponsor the Rally in the Valley, this year. This will be at the close of the National Tribal Emergency Conference. www.tcarc.net/

TURLOC ARC ++ Buck Rock Repeater is alive and well, as of 3:00 PM 6-21-2017 thanks to AT&T Tech David Lee... For those of you have forgotten Buck Rock is located in Kings Canyon, Sequoia National Park area on a dirt and sometimes impassable road just north of Horse Corral... That means, folks it's a good three hour oneway-trip from Atwater. Field Day For the 1st time in the memory of most, TARC cancelled field day... The traditional site on the Schmidt Ranch under the shade trees with picnic tables was in an array of mud and debris due

to the receding waters of the San Joaquin river... With the abundance of snow melt this lower section of the site has been under water and just began to recede... In that the area was not conducive to occupation the decision to hold field day on the upper shelf of the embankment was decided... However with the extreme heat and the lack of shade it was determined, I might say, wisely, to forego Field Day as such.

DMR

Thanks to Sam (K6ACR), former owner of Aircall Communications, TARC is now the proud owner of four new DMR repeaters, A UHF on Mt. Oso, another UHF in downtown Turlock and two, one VHF and one UHF on Mt. Bullion. We wish to thank Sam for this most generous gesture... This network of DMR repeaters will be a welcomed addition to the W6BXN repeater system.

w6bxn.org/arc-over/

The following Amateur became Silent Key since the last report:

.Harry KG60PR, Jan WA6WTF, Roger W60QV, Elvy N0LV and Clem K6G0X

.

They will be missed.
