

CARS NET TO LINK WITH LODI REPEATER

TO: All CARS Members

Ken, AE6LA, will link the CARS repeater to the Lodi Repeater for net tonight (Feb,19) at 7:30pm.

This will allow the Valley Springs members a better opportunity to participate in the net because for them hitting the Fowler repeater has been difficult.

If you want to try checking into the net via Lodi, then use the Lodi repeater freq which is 147.090+ and pl of 114.8hz.

The Lodi group is graciously sanctioning the use of their repeater for the Monday night session.

This will be our first attempt at a link-up for a net. See if you like it.
