

CARS EM-COMM TRAILER

Call for volunteers on CARS em-comm trailer.

Chuck, W6AJW, our CARS president, recently took me on a tour of one of the club's current endeavors, the em-comm trailer. The trailer was donated to the club and is located at Chuck's QTH in San Andreas. For the most part the trailer has been cleared inside allowing for the construction of radio operating positions and equipment shelving. One vhf/uhf port on the roof has been established and HF is planned for. Presently a butternut vertical is inside awaiting it's light of day opportunity along with vhf/uhf antennas. A generator mount is present at the trailer's rear. Chuck reports that he has all the tools needed for the trailer completion and that any assistance to the project will be welcomed. Contact Chuck at (209) 304-3475
