

Summer is Here!

GET YOUR SMOKEY ON

When you're ready to put out your fire, use the drown-stir-feel method:

- Pour lots of water on the fire; drown all embers
- Stir campfire ashes and embers with a shovel
- Pour more water on ashes and stir again
- Make sure everything is cold to the touch

Remember – if it's too hot to touch,
it's too hot to leave.

ONLY YOU CAN
PREVENT WILDFIRES.
