

WB6TOU Readies For Launch

Balloon

David Voit has sent along updates on the launch status of his new high altitude balloon which will carry along a 20 meter WSPR transmitter. The beacon has gone thru successful testing, and the balloon itself has been prepared for the task of carrying the WSPR transmitter along with the antenna made of litz wire. David and his launch crew are waiting for favorable winds that will gently carry the balloon aloft, more information will be made available as the launch progresses.
