

Field Day 2021 Comes To A Close

VOA Delano, Ca

Were you able to catch that station that was eluding you during the pile up? Have the Log squared away and the equipment packed for the trip home? Field Day for 2021 is in the books and hopefully you were able to say hello to a friend in a QTH that you may never be able to have the time to visit. Your signal traveled far into the Ionosphere and used the earth's natural sciences, we haven't found another place quite like it.
