

HOW CURRENT IS YOUR NIMS TRAINING?

By David Coursey, N5FDL

All ARES/RACES/ACS operators should take ICS-100, ICS-200, ICS-700, ICS-800, and the new ICS-802 course that describes the communication functions in the National Response Framework. Many of us should probably retake the ICS-100 and ICS-200 courses that were updated last summer. The ICS-802 course is new as of last August, so it is new to almost everyone.

If the course allows you to download the final exam questions, please do so. I will be much easier to follow the course and pass the exam, as the questions are sometimes unclear.
