On and off showers was the WX last Saturday, but it did not dampen the spirits of the cycling participants nor the volunteers of the radio club. How can you go wrong with an abnormally wet season that has made the hill sides a deep green and the streams and brooks flowing with abundant water, which has not been observed in years. Its a season for the frogs, an A+ was given out to the radio club volunteers from the event organizer for their efforts in providing information on progress of the cyclist and safety. Once the final reports are in we will have more to say about Mr. Frogs Wild Ride. As you must know it a tradition around these parts.
