Summer Field Day – June 28, 2025 and June 29, 2025

Kid's Day – January 4, 2025

Thank you to all of you who have participated in our Community Service Events. Our Club is looking forward to serving our community next year. We will again plan to participate in any biking or running events that depend on us to provide communication support. The success of these events depends upon the participation of our club members. For many years these events have been supported by a very small group of Club Members who tirelessly devote their personal time to making these events successful. We need more club members to participate in these events in order to be able to continue to support these worth while causes. If we are unable to get more members to participate, we may be unable to support some of these Community Outreach Activities. Please plan to participate next year.

Don't forget that we have our Christmas Breakfast at Murphys Hotel scheduled for December 7, 2024 beginning on Saturday at 10:00 a.m. Come dressed in your holiday attire and enjoy the holiday spirit and fellowship with your amateur radio community.

Twice a year ARRL offers an event designed to promote amateur radio to our youth. Share the excitement with your grandkids, a scout group a church group or the general public. Kids Day is designed to give on the air experience to young people and hopefully prosper interest in getting a license of their own. It is also intended to give older Hams a chance to share their station and love for amateur radio with others. Generally, the first Saturday in January, 2025 which is January 4, 2025 and the third Saturday in June.

Check out the 40 meter Monday Net on 7.195 at 9:00 a.m. This is a fun new Net for general rag chewing and the sharing of information. Join in the fun.

Our next meeting of the Calaveras Amateur Radio Society is set for Thursday, November 14, 2024, at 6:30 p.m. located at Round Table Pizza in Angels Camp. Come early and order some food and enjoy some fellowship time with your fellow amateur radio operators.
