## Amazing Views from the Balloon Flight

From: wa6zty

Last Saturday, I was part of the Space Exploration Society at Berkeley's Pi Day (3/14/15) Near Space Balloon Flight. It launched from the main glade (in front of Doe Library) carrying my ham radio GPS tracker, an action camera, and our hopes for a good launch to over 100,000 feet (above sea level). What resulted is an AWESOME flight up to 102,000 feet and a successful recovery the next day (ask me in-person about the FAILED recovery the day-of). Anyway, here are some Quicktime videos to meditate upon prior to vour launch into Portal this evening. It's amazing how auiet things get just a few hundred feet above the ground. And of course sound is a very different when the air is REALLY REALLY thin. OK, without thina

further adieu:

Pi Day Near Space Balloon Flight

Stills and Video

Obviously the first video is the launch itself. The launch prep takes most of the video, but if you forward to 13:40, the Count-down is about to begin.

See you on the launch pad!

expansive adventures!
Jack(space)

PS - There will be more launches to Near Space!
